

8. Problem-Solution Fit Canvas

Date	27 June 2026
Team ID	SWTID-2026-4570
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

1. CUSTOMER SEGMENT(S) [CS] • School / college students studying independently • Exam aspirants (competitive / semester exams) • Self-learners exploring a new subject	6. CUSTOMER LIMITATIONS [CL] • Limited study time between classes/work • No budget for a paid tutor • Inconsistent internet access in some regions	5. AVAILABLE SOLUTIONS [AS] • Generic search engines • YouTube tutorials • Static tutoring apps / paid tutoring services
2. PROBLEMS / PAINS + FREQUENCY [PR] • Hard to get a quick, level-appropriate explanation (daily) • No easy way to self-test on a topic (weekly, pre-exam) • No personalized study roadmap (each new subject)	9. PROBLEM ROOT / CAUSE [RC] Most educational content online is generic and one-size-fits-all — it isn't adaptive to the learner's level, context, or the specific notes/topic in front of them.	7. BEHAVIOR + INTENSITY [BE] Students frequently switch between search engines, video platforms, notes apps and quiz sites — high friction, frequent context-switching, low loyalty to any single tool.
3. TRIGGERS TO ACT [TR] • An upcoming test or assignment deadline • Getting stuck on a concept mid-study session • Wanting to plan a new subject from scratch	10. YOUR SOLUTION [SL] EduGenie: one AI assistant combining Q&A chat, leveled concept explanation, MCQ quiz generation, note summarization and a personalized learning roadmap — powered by Gemini with a local-model / demo-mode fallback.	8. CHANNELS OF BEHAVIOR [CH] Online — accessed as a responsive web app (desktop or mobile browser) served by the FastAPI backend; no installation required.
4. EMOTIONS BEFORE / AFTER [EM] Before: frustration, overwhelm, exam anxiety. After: clarity, confidence, and a clear sense of what to study next.
